Description			
As reported by icefinger on GitHub			
Dear dev,			
The Jessie contains only wx3.0, that changed the access to a constructor to a ::Get (), resulting on a compilation error:			
<code>/usr/include/wx-3.0/wx/unix/stdpaths.h:56:5: error: 'wxStandardPaths::wxStandardPaths()' is protected</code>			
as far I could saw this error concern Main/Application.cpp
