Target version:		Spent time:	0.00 hour
Description			
"Invalid characters encountered" error occurs followed by crash when creating volumes.			

History

#1 - 03/23/2016 08:53 AM - Kyle Marek

- Status changed from New to Resolved

Addressed in b4de5062848848b21be24a35c3c8dbe8bca3a401.

GCC5 broke backwards compatibility (by default) with libraries compiled with older GCC. This error was caused by an ABI incompatibility. A flag was added to the Makefile to use the old ABI until our dependencies are using the new ABI.

#2 - 08/14/2016 01:19 PM - Kyle Marek

Corrected resolution in commit 71ca808157731eb329496ef15e2282efa4aed9f8. Released with v0.7.4.1.
