

CipherShed - Feature #62

Administrative Configuration for Enterprise IT

12/27/2014 11:25 PM - Jason Pyeron

Status:	New	Start date:	12/27/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
IT departments need to configure CipherShed and to configure what the user (non-IT support) may configure.			
Enterprise Policy may require or limit what a user may do on their assigned corporate asset.			
Examples include which algorithms, password complexity, removable media encryption, key escrow, etc.			
In a windows environment this is managed by Active Directory.			

History

#1 - 01/14/2015 07:46 AM - Jason Pyeron

Also add (<https://forum.truecrypt.ch/t/suggesting-simplified-disk-mounting/425>) application user profiles.

Admin UI

User UI

hidden by default menu options, tools installed / not installed, etc.

#2 - 01/14/2015 08:47 AM - Jason Pyeron

- support silent installer - <https://forum.truecrypt.ch/t/windows-unattended-installer-install-truecrypt-silently/176/2>
- support entropy source(s) - e.g. file/pipe/shared library/web service (<https://pthree.org/2014/07/23/entropy-as-a-service/>)

#3 - 01/14/2015 08:52 AM - Jason Pyeron

- silent uninstall - <https://forum.truecrypt.ch/t/silent-uninstall-of-truecrypt/195>
